

THE SCIENTIFIC DAO

What is Scientific DAO?

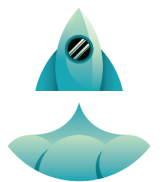

The Scientific Dao will become a decentralized think tank in which inventors, creatives, and institutions can come together to foster growth and incubate emerging technology.

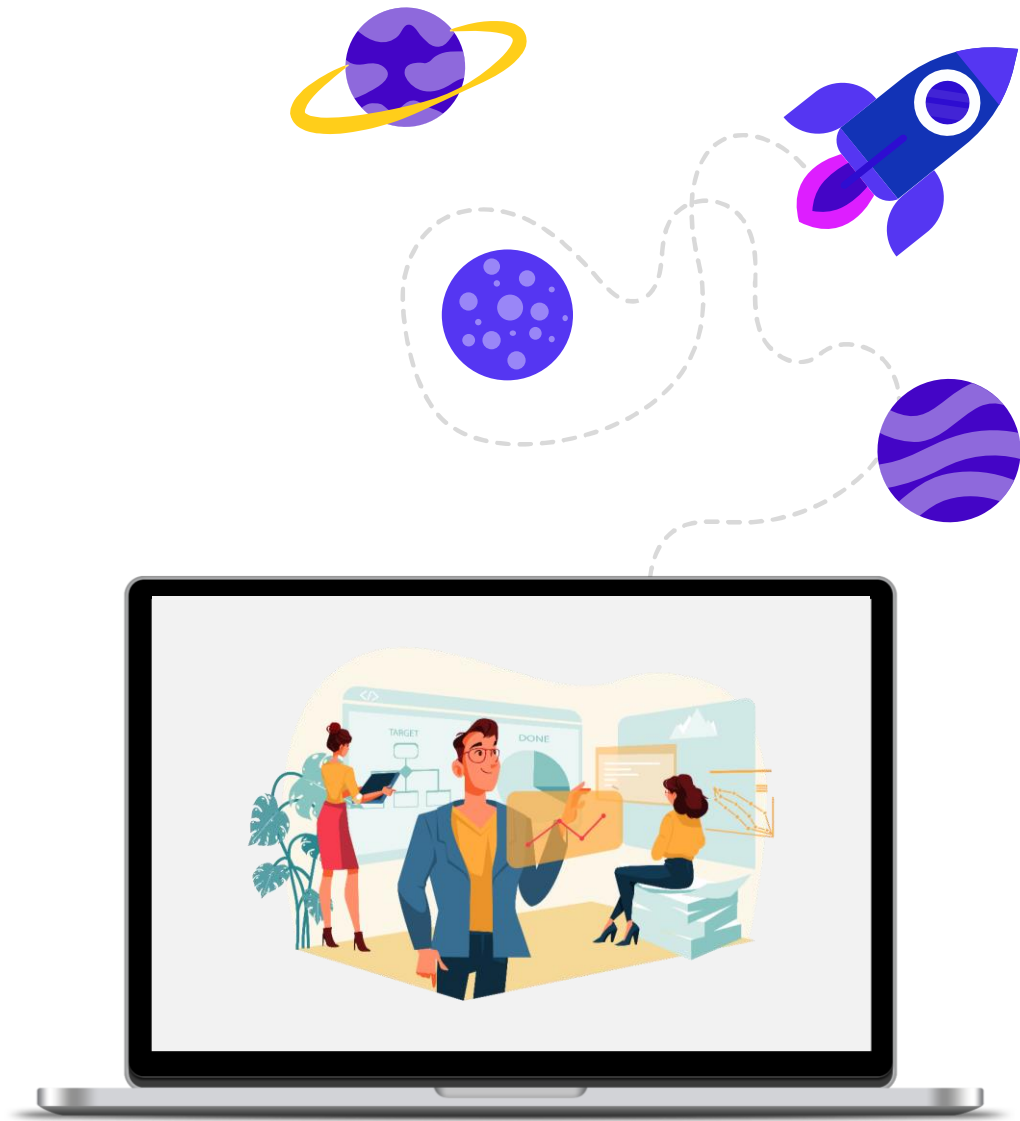

VALUE PROPOSITION

Many creatives and brilliant minds never receive community support for their ideas. Many of these ideas might never see the light of day with the red tape and difficult to get meetings. [The Scientific DAO](#) will help foster these ideas and give everyone access to likeminded and supportive people within the DAO.

THE SCIENTIFIC DAO

WORKFLOW

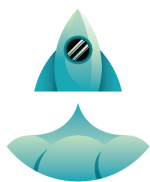

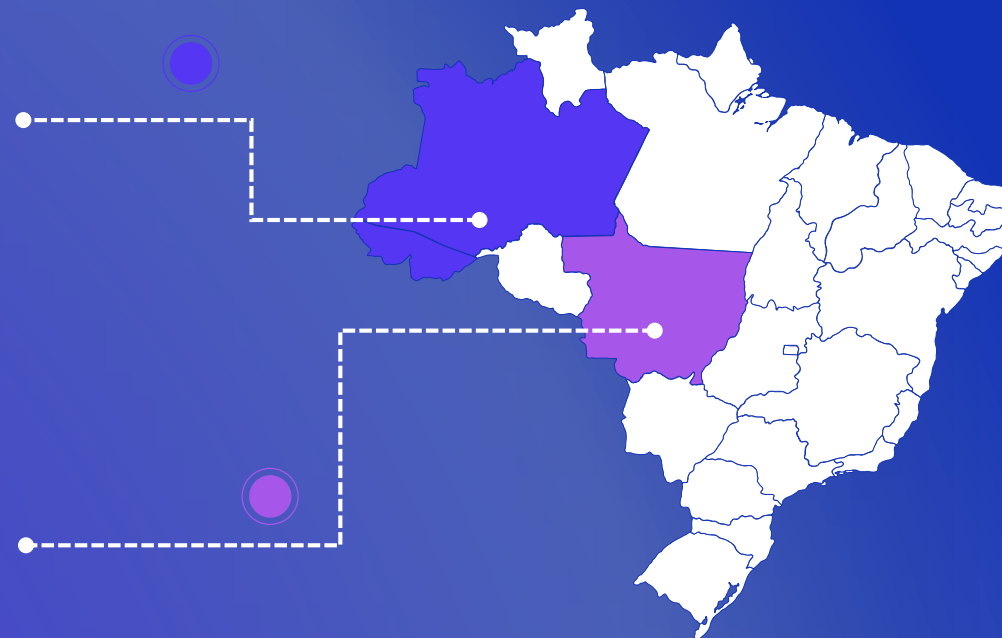

Members of the DAO will be able to submit projects for funding. Not all projects will be chosen however even projects that never receive funding directly from the DAO; have potential to garner support from individuals in the DAO.

 is a governance token in which every token counts as one vote.

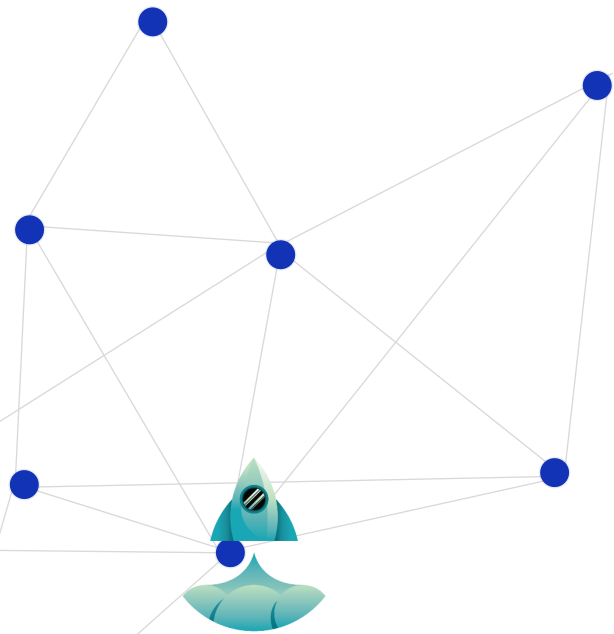

TARGET DEMOGRAPHIC

It will be available to retail participants on the open market; but the key demographic of targeted participants will be scientific funds, institutions, and universities. The team plans on focusing heavily on business development in this regard to create the largest decentralized scientific think tank in the world.

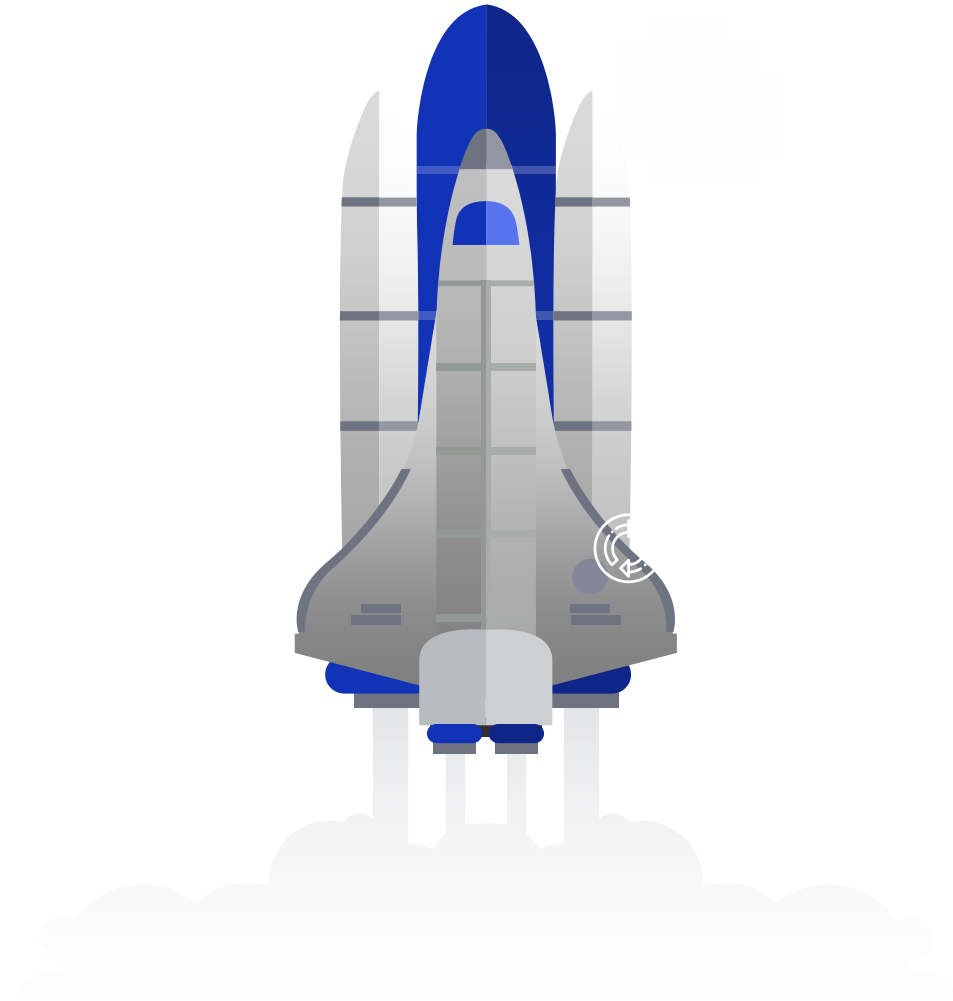

GOAL

The goal is to bring cutting edge technology and scientific breakthroughs to the masses for the betterment of society and humanity. The final goal would be a complete DAO for science.

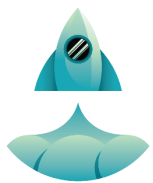

THE SCIENTIFIC DAO

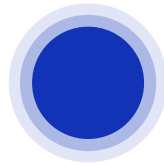

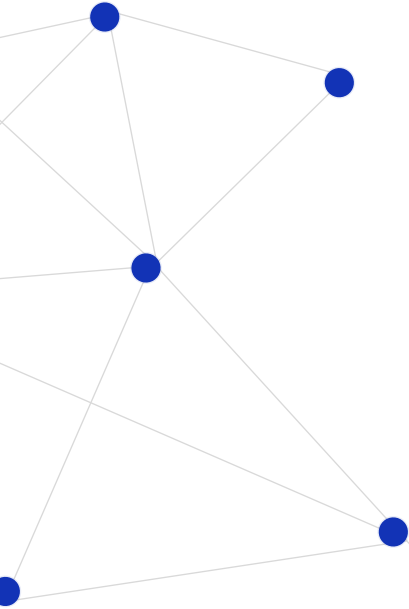

NFTS AND FUNDING

Each proposed invention would have an NFT created to represent that fundraiser. NFT sales would fund the proposed cause. The NFT utility would be propositions such as early purchasing access for market ready products or access to privileged series A venture rounds for additional fundraising.
